Natural Convection Drying Oven

DON-H45E DON-H45 DON-H70E DON-H70
DON-H140E DON-H140 DON-H230E DON-H230

Key Features

Energy-saving

Adopts new synthetic silicone sealing, better sealing effect, preventing heat loss effectively.

Automatically adjust the control parameters according to the ambient temperature and load to achieve the optimal heating method and reduce energy consumption.

Humanized design

Built-in observation window to make the objects in the chamber clear at a glance.

The anti-scalding design of the door handle makes it easy to open and close the door.

Intelligent control

Digital display, with intelligent PID control, parameter real-time display.

Button operation, simple and convenient, can quickly set temperature and time parameters.

Dedicated sheet metal processing (Without E types)

The shelf can be disassembled and can be freely adjusted up and down

The inner chamber is made of high-quality stainless steel, with strong corrosion resistance.

Dedicated sheet metal processing (E types)

The shelf can be disassembled and can be freely adjusted up and down

The inner chamber is made of high strength galvanized sheet, with strong corrosion resistance.

With over temperature control of visible & audible alarm system.

Sensor deviation correction, temperature auto-tuning, power-off parameter memory, loop self diagnosis.

Application

The product is used for drying, baking, waxing and sterilization in industrial and mining enterprises, laboratories and scientific research institutions.

Optional

Spare shelf

- DOF-V240A DOF-V240B

Internal circulation system

Back suction and bottom forced convection system.

Adopts high-quality fan motor, has higher ventilation efficiency and better temperature uniformity.

The inner chamber is made of high-quality brushed stainless steel, with strong corrosion resistance.

Key Features

Energy-saving

Adopts new synthetic silicone sealing, better sealing effect, preventing heat loss effectively.

Automatically adjust the control parameters according to the ambient temperature and load to achieve the optimal heating method and reduce energy consumption.

Intelligent control

Large high definition LCD display, with intelligent PID control, parameter real-time display.

Menu-type operation interface, simple and convenient operation, can quickly set temperature and time parameters.

Dedicated sheet metal processing

The shelf can be disassembled and can be freely adjusted up and down, with a minimum spacing of 30mm.

The shelf is laser hollowed out with round holes for better ventilation and better temperature uniformity.

Dedicated sheet metal processing

Built in observation window to make the objects in the chamber clear at a glance.

The anti-scalding design of the door handle makes it easy to open and close the door.

The insulation material is made of high-quality aluminum silicate silk cotton, and the insulation layer of the chamber is thickened.

Equipped with leakage protection device to ensure the safety of operators and other equipment in the laboratory.

With over temperature control of visible & audible alarm system.

Self-diagnosis function.

Application

It is widely used in chemical industry, electronic communication, plastics, cables, electroplating, hardware, automobile, optoelectronics, rubber products, molds, spraying, printing, medical treatment, aerospace and universities and other industries.

Optional

Spare shelf

Multi-segment programable control
(USB data storage, RS485 / 232 port
and build-in printer)

Digital independent temperature limiter

Forced-Air Drying Oven

DOF-27 DOF-91 DOF-136 DOF-216

Key Features

Energy-saving

Good thermal insulation design keeps the surface of the box at a lower temperature and saves energy consumption.

Automatically adjust the control parameters according to the ambient temperature and load to achieve the optimal heating method and reduce energy consumption.

Dedicated sheet metal processing

Outer box material: cold-rolled steel surface sprayed with plastic; inner material: SUS stainless steel plate.

Pull-out movable shelf.

Internal circulation system

Forced convection system.

Stainless steel tube loop heater.

Side air outlet, the air volume can be adjusted.

Adopts high-quality fan motor, has higher ventilation efficiency and better temperature uniformity.

Intelligent control

Color LCD display, PID temperature controller, precise temperature control.

Menu-type operation interface, simple and convenient operation, can quickly set temperature and time parameters.

Independent external galvanic temperature protection device.

Non-contact relay, avoid electromagnetic and high frequency interference.

High power and heavy load motor, stable operation.

Application

It is widely used in chemical industry, electronic communication, plastics, cables, electroplating, hardware, automobile, optoelectronics, rubber products, molds, spraying, printing, medical treatment, aerospace and universities and other industries.

Vacuum Oven

DOV-25S DOV-55S DOV-90S

Key Features

Energy-saving

Adopts new synthetic silicone sealing, better sealing effect, preventing heat loss effectively.

Intelligent control

Large high definition LCD display, with intelligent PID control, parameter real-time display.

Dedicated sheet metal processing

The shelf can be disassembled and can be freely adjusted up and down.

The inner chamber is made of high-quality stainless steel, with strong corrosion resistance.

4-sides heating method, temperature conduction by shelves.

Humanized design

Built-in observation window to make the objects in the chamber clear at a glance.

The anti-scalding design of the door handle makes it easy to open and close the door.

The insulation material is made of high-quality aluminum silicate silk cotton, and the insulation layer of the chamber is thickened.

Application

Vacuum drying oven is designed for drying heat-sensitive, easily decomposed, easily oxidized substances, widely used in medicine, food, light industry, chemical industry, agricultural scientific research, environmental protection and other experimental fields.

Safety

With over temperature control of visible & audible alarm system.

Sensor deviation correction, temperature auto-tuning, power-off parameter memory, loop self diagnosis.

Optional

Spare shelf, silica gel connecting pipe, vacuum pump.

Optional	Spare shelf, silica gel connecting pipe, vacuum pump		

Vacuum Oven

DOV-55P DOV-90P DOV-55PV DOV-90PV

Key Features

Energy-saving

Adopts new synthetic silicone sealing, better sealing effect, preventing heat loss effectively.

Intelligent control

5 inches touch screen display, with intelligent PID control, programmable temperature controller, parameter real-time display.

Dedicated sheet metal processing

The inner chamber is made of high-quality stainless steel, the outer chamber is made of 304 high-quality stainless steel, with strong corrosion resistance.

Humanized design

Built-in observation window to make the objects in the chamber clear at a glance.

The anti-scalding design of the door handle makes it easy to open and close the door.

The insulation material is made of high-quality aluminum silicate silk cotton, and the insulation layer of the chamber is thickened.

Application

Vacuum drying oven is designed for drying heat-sensitive, easily decomposed, easily oxidized substances, widely used in medicine, food, light industry, chemical industry, agricultural scientific research, environmental protection and other experimental fields.

With over temperature control of visible & audible alarm system.

Sensor fault alarm, excessive vacuum alarm.

Sensor deviation correction, temperature auto-tuning, power-off parameter memory, loop self diagnosis.

Optional

- Spare shelf
- Built-in printer
- RS485 port
- USB data storage
- Vacuum pump

Key Features

Energy-saving

Adopts new synthetic silicone sealing, better sealing effect, preventing heat loss effectively.

Automatically adjust the control parameters according to the ambient temperature and load to achieve the optimal heating method and reduce energy consumption.

Internal circulation system

Forced convection system.

Adopts high-quality fan motor, has higher ventilation efficiency and better temperature uniformity.

Intelligent control

Digital display, with intelligent PID control, parameter real-time display.

Button operation, simple and convenient, can quickly set temperature and time parameters.

Dedicated sheet metal processing

The shelf can be disassembled and can be freely adjusted up and down.

The inner chamber is made of high-quality mirror stainless steel, with strong corrosion resistance.

Humanized design

Built-in observation window to make the objects in the chamber clear at a glance.

Drying Oven / Incubator (Dual-use)

DOI-30Z DOI-50Z DOI-70Z DOI-140Z DOI-240Z

Key Features

Energy-saving

The sealing ring of incubator adopts a new type of synthetic silicone sealing strip, which effectively prevents heat loss.

Automatically adjust the control parameters according to the ambient temperature and load to achieve the optimal heating method and reduce energy consumption.

Intelligent control

Large-screen LCD display, real-time parameter display, simple and convenient operation.

Running function: fixed value running, timing running, the screen displays "END" when the running time is completed, accompanied by a buzzer reminder.

Internal circulation system

The circulation system adopts the back suction and the air circulation on both sides mode.

The shelf is laser hollowed out with round holes for better ventilation and better temperature uniformity.

Dedicated sheet metal processing

The shelf can be disassembled and can be freely adjusted up and down, with a minimum spacing of 30mm. The inner tank is made of high-quality brushed stainless steel, with strong corrosion resistance.

Built in observation window to make the objects in the chamber clear at a glance. The anti-scalding design of the door handle makes it easy to open and close the door.

Equipped with leakage protection device to ensure the safety of operators and other equipment in the laboratory.

The insulation material is made of high-quality aluminum silicate silk cotton, and the insulation layer of the box is thickened.

With limited temperature control sound and light alarm system.

Self-diagnosis function: display fault information, which is convenient for judging the fault point.

Application

It can be used as an incubator for industrial and mining enterprises, laboratories, scientific research units, etc. to cultivate viruses and bacteria; it can also be used as a drying oven for drying, baking, melting wax, and sterilization.

Drying Oven / Incubator (Dual-use)

DOI-45H DOI-72H DOI-125H DOI-210H

Key Features

Energy-saving

Adopt new synthetic silicone sealant strip, can run at high temperature for a long time.

The temperature rises rapidly, forced convection, and the dry hot air passes directly through the heated object, and the drying and disinfection time is significantly shortened.

The three-gear fan speed can be adjusted and timed by instrument setting, and the shelf can be moved to facilitate cleaning inside the box.

Dedicated sheet metal processing

The shell of the product is made of high quality cold-rolled steel plate and the surface is treated by spraying process.

The inner chamber is made of 304 mirror stainless steel.

Intelligent control

High-precision microcomputer LCD temperature controller, accurate and reliable temperature control.

Function: timing, over-temperature alarm indication, temperature deviation correction, temperature control self-tuning, automatic speed regulation of fan, door control (Once the door is opened, the heating will be automatically stopped to effectively prevent the machine from overheating) etc.

Humanized design

Built-in thickened double layer toughened glass observation window to make the objects in the chamber clear at a glance.

The anti-scalding design of the door handle makes it easy to open and close the door.

Internal circulation system

Forced convection system

Equipped with fan speed control switch, users can choose to "adjust the wind speed manually" or directly choose "automatic speed regulation of fan according to their needs."

Once the temperature exceeds the limit, the machine will automatically stop heating to ensure the safety of personnel and equipment.

With over temperature control of visible & audible alarm system.

Application

It is suitable for drying, baking, wax melting and heat treatment in laboratories of industrial and mining enterprises, colleges and universities, scientific research institutes, medical and health care, etc.

High Temperature Oven

DON-H130 DON-H220 DON-H640

Key Features

Energy-saving

Adopts new synthetic silicone sealing, better sealing effect, preventing heat loss effectively.

Automatically adjust the control parameters according to the ambient temperature and load to achieve the optimal heating method and reduce energy consumption.

Dedicated sheet metal processing

Outer box material: cold-rolled steel surface sprayed with plastic; inner material: SUS stainless steel plate.

Top-mounted air outlet, easy to switch.

Pull-out movable shelf.

Intelligent control

LED display, PID temperature controller, precise temperature control.

Continuous operation or timed operation: 0 ~ 9999min; with parameter memory function, it will automatically resume operation after incoming calls.

The resistance wire at the bottom can be heated, and there is a temperature switch. Suitable heating power can be selected according to different temperatures.

Menu-type operation interface, simple and convenient operation, can quickly set temperature and time parameters.

Internal circulation system

Natural convection system.

Application

This product is used for drying, baking, wax melting and sterilization in industrial and mining enterprises, laboratories and scientific research units. This drying oven is suitable for heating, drying or heat treatment below 500 °C, and is not suitable for baking volatile items and flammable and explosive items.

Forced Air Drying Oven

DOF-50A DOF-100A DOF-200A

Key Features

Energy-saving

Adopts new synthetic silicone sealing, better sealing effect, preventing heat loss effectively.

Intelligent control

Large high definition LCD display, with intelligent PID control, parameter real-time display.

Internal circulation system

Back suction and bottom forced convection system.

Adopts high-quality fan motor, has higher ventilation efficiency and better temperature uniformity.

Dedicated sheet metal processing

The inner chamber is made of high-quality brushed stainless steel, with strong corrosion resistance.

Humanized design

The anti-scalding design of the door handle makes it easy to open and close the door.

The insulation material is made of high-quality aluminum silicate silk cotton, and the insulation layer of the chamber is thickened.

Application

It is used for drying and constant temperature testing of various products and materials and electrical, components, electronics, electricians, automobiles, aviation, hardware tools, etc. under constant temperature conditions.

Equipped with leakage protection device to ensure the safety of operators and other equipment in the laboratory.

With over temperature control of visible & audible alarm system.

Self-diagnosis function.

Optional

- Spare shelf
- Multi-segment programable control
- USB data storage
- RS485 port
- RS232 port
- Build-in printer
- (USB data storage, RS485, RS232 port and Build-in printer :incompatible, please select only one of the four options)
- Digital independent temperature limiter

Sterilizing Oven

DOF-HAS20A DOF-HAS50A DOF-HAS70A
DOF-HAS100A DOF-HAS200A

Features

Energy saving

The sealing ring of incubator adopts a new type of synthetic silicone sealing strip, which effectively prevents heat loss.

Automatically adjust the control parameters according to the ambient temperature and load to achieve the optimal heating method and reduce energy consumption.

Intelligent LCD control

Large-screen LCD display, real-time display of parameters, self-locking function of screen, convenient menu-type operation interface, simple and convenient operation, and can quickly set temperature and time parameters.

Running function: fixed value running, timing running; The screen will display "END" with a beeping reminder after the running time is completed.

Program control instruments can be added, and up to 30 programs can be set to control temperature and time. Each program can be set for 1-99 hours and 59 minutes.

Internal circulation system

Adopts high-quality fan and large impeller fan, the machine has higher ventilation efficiency and better temperature uniformity.

The circulation system adopts the back suction and the bottom vertical air supply mode.

Better ventilation and temperature uniformity.

Dedicated sheet metal processing

The box body is formed in one step by laser cutting. The outer box is made of high-quality cold-rolled steel plate with anti-static spray coating on the surface, and the inner tank is made of high-quality brushed stainless steel.

The shelf is made of high-quality stainless steel, and a load-bearing beam can be added at the bottom of the shelf to increase the load-bearing capacity.

The shelves are designed with sliding bayonet to prevent tilting and misalignment.

The inner tank is designed with large arc corners, no dead corners, and easy to clean and maintain.

Stainless steel wire drawing treatment with strong corrosion resistance.

The shelf can be disassembled and can be freely adjusted up and down, with a minimum spacing of 30mm.

Built in tempered and double-layer observation window to make the objects in the chamber clear at a glance.

The anti-scalding design of the door handle makes it easy to open and close the door.

SAFETY

Equipped with leakage protection device to ensure the safety of operators and other equipment in the laboratory.

Self-diagnosis function: display fault information, which is convenient for judging the fault point.

The insulation material is made of high-quality aluminum silicate cotton, and the insulation layer of the chamber is thickened to ensure a lower temperature on the surface of the chamber and safer operation.

Internal limited temperature control sound alarm system, the heating stops working when the temperature limit is exceeded, and the sound automatically alarms when the alarm temperature is exceeded.

High or low temperature and over-temperature alarm.

Description

It uses high-temperature dry heat to oxidize microorganisms, denature proteins, and cause poisoning due to electrolyte concentration. The main one is to destroy the cell protoplasm through oxidation, so that the microorganisms die, so all microorganisms can be killed within a certain heating time.

Dual Convection Oven

DOF-H42Z DOF-H70Z DOF-H135Z DOF-H224Z

Key Features

PID temperature controller with LED digital display, ensuring precise temperature control.

Continuous or timed operation: 0~9999min.
Equipped with a parameter memory function, automatically resuming operation upon power restoration.

Outer casing material: Cold-rolled steel plate with powder coating; Inner casing material: SUS stainless steel plate.

Features an inner glass door, but no observation window on the outer door; Top-mounted adjustable air outlet.

The inner chamber features a rounded arc design for easy cleaning.

Removable shelves with adjustable spacing.

Bottom resistance wire heating with a temperature selector switch, allowing selection of the appropriate heating power based on the temperature.

The fan can be turned off, transforming it into a natural convection constant temperature drying oven.

- ◆ Capacity: 42L, 70L, 135L, 224L
- ◆ Circulation Mode: Forced convection
- ◆ Temperature Range: 50-300°C
- ◆ Equipped with parameter memory function
- ◆ PID temperature controller with LED digital display

Application

It is used for drying, baking, wax melting, and sterilization in industrial and mining enterprises, laboratories, and research units.

Specifications

Model	DOF-H42Z	DOF-H70Z	DOF-H135Z	DOF-H224Z
Capacity (L)	42	70	135	224
Circulation Mode	Forced convection, Bottom heating			
Dimensions (W*D*H)	Internal (mm)	350*348*350	450*348*450	550*448*550
	External (mm)	677*527*642	777*527*742	877*627*842
Temperature Range (°C)	50-300			
Temperature Uniformity (°C)	≤ Max. Temp. ±2.5			
Temperature Fluctuation (°C)	±1			
Shelves	2	2	3	3
Electricity	Voltage / Frequency 1Ø, 220V/50Hz			
	Consumption (W)	1600	2400	3000
Alarm Type	Over temperature alarm, temperature probe damage alarm			

Infrared Fast Heating Drying Oven

DON-IF72H DON-IF138H DON-IF270H

Key Features

PID temperature controller with LED digital display for precise temperature control.

Infrared thermal radiation heating method, efficient and rapid.

Supports continuous or timed operation: 0~9999min.

Equipped with a parameter memory function, automatically resuming operation upon power restoration.

Outer casing material: Cold-rolled steel plate with powder coating; Inner casing material: SUS stainless steel plate.

There is no glass inner door, and the outer door has an observation window.

Top-mounted adjustable air outlet.

The inner chamber adopts a rounded arc structure design for easy cleaning.

Removable shelves with adjustable spacing.

Optional

Independent external temperature protection device.

LCD screen temperature controller.

LCD screen temperature controller + RS485 communication interface.

LCD screen temperature controller + micro dot-matrix printer.

RS485 to USB adapter.

- ◆ Capacity: 72L, 138L, 270L
- ◆ Circulation Mode: Natural convection
- ◆ Temperature Range: 50-250°C
- ◆ Equipped with parameter memory function
- ◆ PID temperature controller with LED digital display for precise temperature control

Application

It adopts efficient and low consumption far-infrared heating technology, which has good effects on rapid drying work and test samples. It can be widely used in industrial, agricultural, medical, scientific research projects and laboratories.

Specifications

Model	DON-IF72H	DON-IF138H	DON-IF270H	
Capacity (L)	72	138	270
