Benchtop Freeze Dryer

LYO60B-1S LYO60B-1P LYO60B-1T LYO60B-1PT

Reliability

Condenser and operation panel are made by stainless steel.

High performance compressor, cascade system,high cooling efficiency and fast cooling speed.

Drying chamber is transparent which is visual and safe.

Key Features

- 7 inches colorful touch panel can display the product sample's temperature, condenser temperature and vacuum etc in digital and curve.
- Touch panel with the design conforms to ergonomics and operate more comfortably.
- With USB interface to export the data, convenient for user information management.
- Compact bench-top design with a small footprint.
- Large-volume stainless steel condenser without coils, which can realize independent sample pre-freezing.

Parts

Standard chamber

Stopper chamber

Standard stopper with 8 port manifolds

Stainless steel drying chamber

Standard chamber with 8 manifolds

Stainless steel with 8 port manifolds

Isolation valve

Valve and freeze drying bottle

Application

The lab series freeze dryer is suitable for freeze drying test of laboratory biomedical samples. Widely used in drugs, biological products, chemical and food industries. On the heat-sensitive substances such as antibiotics,vaccines, blood products, hormones and other biological tissue enzymes, freeze-drying technology is applied.

Household Small In-situ Freeze Dryer

LYO40-IS1F LYO40-IS4F LYO40-IS6F

Reliability

In-situ freeze-drying design,avoid the contamination during material transfer.

High transparent organic glass in Drying chamber helps users to observe materials changes.

Imported brand compressor, high cooling efficiency and fast cooling speed.

Vacuum pump is connected by international standard KF quick connector.

Key Features

- Colorful touch panel can display the product sample's temperature, Condenser temperature and vacuum etc in digital and curve.
- One-button start defrosting function, simple and fast.
- Compact design with a small footprint.
- With USB interface to export the data, convenient for user information management.
- Rack temperature can adjustable, controllable which helps to search for freeze-drying technology.
- Large-volume stainless steel condenser without coils, which can realize independent sample pre-freezing.

Application

The freeze dryers are developed from specific uses to households. Household small in-situ freeze dryer, which is widely used in freeze-drying of fruits, vegetables etc, is suitable for home use and small amount of freeze-dried use. And it is recommended to be used preferentially for freeze-dried vegetables and fruits.
